Details: COVID 19 is still spreading worldwide, there are currently no vaccines available and little evidence on the effectiveness of therapeutic agents. In addition, there is presumably no pre-existing immunity in the population against the new coronavirus and everyone in the population is assumed to be susceptible.

While the majority of cases are milder respiratory infections and pneumonias, severe illness and death is more common among the elderly with more chronic underlying conditions, with these groups accounting for the majority of severe disease and fatalities to date.

All should follow Government advice (Links to the latest government advice are within the corporate section of our 360 homepage, or can be found via a search engine) and adapt to their situation - dynamic risk assessment to be carried out by all.

Each marina has an individual COVID-19 risk assessment that is included within Marina Emergency Response Plan and read in conjunction with all emergency scenarios.

The risk assessment should also be read in conjunction with Premier's other COVID-19 related risk assessments and Premier's COVID-19 Customer Safety in a Marina Environment document and any other relevant risk assessments and SOP's.

Hazards and Controls:

Identified Risk				Residual Risk		
Item No.	Hazard Identification	Hazard Potential & Consequences	People at Risk	Risk	Control Measures	Residual Risk
1	COVID-19 Infection and/or Transmission	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Current Social distancing measures must be implemented/adopted by all staff, berth holders and visitors in order to mitigate the impact of the epidemic and to reduce the chance of another epidemic peak. This can interrupt human to human transmission chains, reducing further spread and reduce the chances of any increase in cases. Premier staff when attending work must have their temperature checked using a non-contact thermometer in accordance with Premier's Temperature Checks Protocol. Any person displaying a temperature reading of 38 degrees or more must return home immediately and follow government guidelines regarding self-isolation. Premier staff and all within the marina are to maintain 2 metres social distancing wherever possible. 1m+ social distancing with risk mitigation (where 2m is not viable) will be acceptable in some circumstances from 4 July 2020. Risk mitigation measures include but are not limited to: Limit the number of people or households that you come into contact with, e.g. avoid peak travel. Sit / stand side by side or behind other people, rather than facing them. Meet people outdoors, rather than indoors. Keep interactions brief. Use screens to segregate people and re-position desks and workstations. Wear a face covering on public transport, in shops or crowded indoor environments Increase ventilation. Avoid loud talking or shouting with others. To minimise the risk of transmission via surface contact, you should:	Substantial 10

				High	<p>Regularly wash your hands using soap and water or use hand sanitiser. Avoid touching surfaces and do not touch your face. Dispose of waste safely, including items such as paper face masks or gloves. In all cases, you must not go to work or attend other public spaces if you are symptomatic, or a member of your household is symptomatic. It is worth noting that current guidance states that face masks and face coverings are only effective to protect others from the wearer and there is little evidence to suggest how effective they are against the virus. There may also be an increased risk due to the increased touching of the face due to adjusting the mask and the mask becoming contaminated and wet. For these reasons the wearing of face masks at work as a matter of course is not recommended outside of care settings. It must be emphasised to all that the wearing of face masks must not be used as an alternative to maintaining social distancing.</p> <p>The immediate isolation of any person(s) suspected or confirmed to be infected with COVID - 19.</p> <p>Discourage non-essential travel and meetings, implementing alternatives where possible such as teleworking, conference calls.</p> <p>Ensure that all visitors to our sites, including staff and berth holders are aware of the seriousness of COVID-19. A high degree of understanding, solidarity and discipline is required to apply strict personal hygiene, coughing etiquette, self-monitoring and social distancing measures at all times. Refrain from touching face, eyes, mouth until hands have been washed appropriately. Remember! The best way to reduce any risk of infection is good hygiene and avoiding direct or close contact with a potentially infected person. Appropriate signage to be installed in strategic positions.</p> <p>Where staff have the facility to work from home this should be considered in accordance with current guidance.</p> <p>Marina receptions and all offices must have appropriate social distancing measures implemented and screens installed where required. Traffic should be kept to an absolute minimum. Enhanced cleaning regimes should be implemented and maintained.</p>	Low

				High	<p>Adequate facilities should be provided to enable hand washing at all offices and any other places that it may be required. i.e. hand sanitiser stations, disinfectant for surfaces. If marina receptions and offices have a kitchen/welfare facility then the following must be applied where possible and suitable disinfectant and kitchen roll provided: 1. Signage outside and inside the kitchen area detailing social distancing and enhanced cleaning measures. 2. Tape/signage on the floor by the kitchen entrance ensuring 2m social distancing is maintained. 3. All non-essential items should be removed from the kitchen area to reduce the amount of cleaning required and potential contamination. 4. One person in the kitchen at any one time. 5. All communal cups, items of crockery and cutlery to be removed or stowed away, staff to use their own and wash and put away immediately after use (in bags, own desk space, etc.). Dishwashers should remain empty and not used. 6. All surfaces must be wiped down after consuming food and drink. 7. All tea towels to be removed and kitchen roll/wipes used as an alternative. 8. Every item of equipment used and touched including all surfaces, kettles, switches etc. should be cleaned afterwards by the user with disinfectant cleaner. 9. Staff only to prepare their own food and drink and are advised to bring packed lunches requiring minimal preparation, pre-prepared meals and refillable drinking bottles from home. 10. No used or dirty items are to be left unattended in kitchens or work spaces at any time. 11. All items must be removed from the fridge apart from what is to be used that day and staff only to touch their items. All unused items should be taken away on completion of work. Fridges should be cleaned at least daily. 12. Kitchen to be deep cleaned each morning and evening and the bin must be lidded and emptied at least once daily and at the end of each working day.</p> <p>Maintain social distancing measures at all times and in the event of possible emergency situations including administering First Aid, appropriate PPE should be worn.</p> <p>Prior to, and on completion of equipment being used/touched it should be wiped down with alcohol swabs or soap and water. Disposable gloves should be used where required and disposed of</p>	Low

					wherever possible. Surfaces touched including tools should be wiped down and cleaned on completion of work. Gloves should be removed and disposed of or stored appropriately and hands washed thoroughly prior to removing the face mask. Gloves and masks should be disposed of correctly where appropriate and hands washed thoroughly on completion.	
4	Leisure Moorings	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public -	Intolerable 20	Berth holders using their boats then ongoing dynamic risk assessment and maintaining current social distancing should be adhered to by all and the boat owner should be reminded when this is not the case. When necessary the authorities should be contacted. Current government social distancing measures apply. Until 4 July 2020, boat owners should not stay on their boats overnight, as per government guidance. Overnight stays on board all boats are permitted from 4 July 2020. Current government guidance also confirms that gatherings indoors should only occur in groups of up to 2 households. With the revised social distancing requirements (from 4 July 2020), 1m+ with mitigation measures and the permission of up to 2 households being allowed to gather indoors and stay in overnight accommodation/a boat, British Marines interpretation of the guidance would therefore allow 2 households to stay on board a single boat as long as they were able to keep a 1m social distance whilst implementing additional mitigation measures. This is the responsibility of the boat owner and examples of how this could be achieved is outlined in the government guidance. Premier to provide usual staffing and facilities for these services. Visiting boats to the marina shall be permitted in a limited capacity from the 4 July 2020. The amount of visitors that can be accommodated vary in number per marina. International/non-domestic visitors are currently not permitted. All other measures contained in this risk assessment should be considered/adopted when accepting visitors.	Substantial 10
5	Commercial Moorings - Fishing, Police, RNLI, RN etc.	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms)	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Ongoing dynamic risk assessment and maintain current social distancing measures at all times. Premier to provide usual staffing and facilities for these services.	Substantial 10

6	Fuel Provision - only supplied to supply essential commercial activities such as fishing, Police, RNLI, RN etc.	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Ongoing dynamic risk assessment and maintain current social distancing measures at all times. Premier to provide usual staffing and facilities for these services. All other fuel delivery risk assessments and safe operating procedures should be followed.	Substantial 10
7	Residential Moorings - Formal Residential and Non-Formal Residential	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Formal Residential - Ongoing dynamic risk assessment and maintain current social distancing measures as per current guidance. Premier to provide usual staffing and facilities for these services.	Substantial 10
8	Marina tenants - Marine and Non-Marine - Can these services be conducted safely and social distancing measures followed?	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Tenants operating in a marina must have confirmed in writing that they have considered COVID-19 in risk assessment for their activities. Ongoing dynamic risk assessment and maintain current social distancing measures as per current guidance. Premier to provide usual staffing and facilities for these services.	Substantial 10
9	Contracting and or spreading the Coronavirus during emergency situations	Mild and Severe Respiratory infection, Pneumonias (mild and severe), Severe disease leading to death, Asymptomatic (no symptoms) -	- All staff, all visitors, all berth holders, all members of the general public	Intolerable 20	Minimum staffing levels are crucial and each marina should always have sufficient staff present to adopt emergency scenarios detailed in the Marina Emergency Response Plan (ERP). In the event of an emergency situation normal emergency procedures will apply - specifically surrounding Fire Safety and the ability to meet the requirements of the Regulatory Reform Fire Safety Order 2005 in the event of a fire alarm activation normal emergency procedures will apply. Where not possible the ERP must be amended accordingly. Fire alarm, emergency lighting and other fire safety systems /checks/statutory maintenance obligations should be maintained wherever possible, including maintenance by 3rd party qualified engineers. Where not possible then the number of local checks should be increased and this should be recorded ensuring that any systems remain fully functional with the qualified engineer attending at the first available opportunity. The organisation's insurance company must be notified when statutory 3rd party checks are not carried out or maintained. Evacuation routes must be maintained and checked regularly with COVID-19 measures being considered.	Substantial 10

					<p>During an evacuation of a building or any other area relevant staff should understand the evacuation strategy, COVID-19 and social distancing measures must be maintained including at Muster points. Muster points must be capable of accommodating all personnel whilst maintaining social distancing measures. Where this is not possible then additional Muster points must be identified, clearly marked with additional signage and any emergency procedure updated and distributed accordingly. PEEP's must continue to be conducted and reviewed where appropriate.</p> <p>In order to reduce disruption, maintain fire safety and minimise the need for external persons (in this case Firefighters) to enter the premises at a time when there may be a COVID-19 transmission risk the following should be considered: If the fire alarm activates, commence the normal emergency procedures. Suitably trained staff should investigate the source of the alarm seeking to establish if it is a fire or a false alarm. If at any point during the investigation a fire is discovered or there is a smell of burning or smoke that cannot be accounted for, dial 999 and ask for the fire service immediately, stating that an evacuation is in progress. If, following the investigation, you are certain that there is no fire, and no suspicion of a fire, then the emergency procedures can be cancelled. Under these circumstances, do not call the fire service. The fire alarm system should be re-set by a competent member of staff and the fire alarm log book or Incident recorded on Engage updated with a record of the event. To prevent any unnecessary disruption, ensure that any known problems causing false fire alarms are immediately corrected, so that there is a high degree of confidence that fire alarms that do occur are genuine.</p>

CM-001136	Corrective Action	Live		<p>Stay active and try to leave the house every day and get some fresh air.</p>
CM-001137	Corrective Action	Live		<p>Take regular breaks, especially when sat in front of a screen all day.</p>
CM-001138	Corrective Action	Live		<p>Take notice of your mood, and that of colleagues and discuss openly if you are struggling.</p>

CM-001139	Corrective Action	Live		Spend a few minutes settling into your work space, prioritising your to do list and preparing to be at work. In the same way, practice a shut-down at the end of the day.
CM-001140	Corrective Action	Live		A sensible worktop and screen arrangement are essential and consider the same principals from your office based DSE assessment. In due course if the need to work from home becomes more permanent then Premier will offer remote Display Screen Assessments. In the meantime make sure you are comfortable, at the very least you should use a comfortable chair.
CM-001141	Corrective Action	Live		Regular contact, briefings and updates from Head Office and managers. All employees to check 360 homepage regularly for corporate messages.
CM-001142	Corrective Action	Live		Boatyard services and Contractors can only conduct their work where these services can be conducted safely and current social distancing measures can be maintained. Usual contractor procedure to be followed i.e. marina reception door closed and social distancing maintained however, COVID-19 must have been considered in the contractors' risk assessment. All of the relevant measures detailed in Section 1 above in this Premier risk assessment should be considered and adopted where appropriate. Active monitoring of contractors to continue with additional measures above considered and contractors must be asked to leave if they are not complying with government guidelines and recommendations. Ongoing dynamic risk assessment and maintain social distancing. Premier to provide usual staffing and facilities for these services.
CM-001143	Corrective Action	Live		All Premier work processes should be adapted to accommodate 2m social distancing measures where possible. Where work is undertaken by Premier employees and 2 metres social distancing is not achievable i.e. emergency situations then all of the relevant measures detailed in Section 1 above in this Premier risk assessment should be considered and adopted where appropriate.
CM-001144	Corrective Action	Live		A face mask must never be considered or adopted as a substitute for social distancing. Staff undertaking any type of work must not be showing symptoms of the coronavirus.

CM-001145	Corrective Action	Live		<p>If wearing a mask, hands must be thoroughly washed prior to donning a face mask.</p> <p>Disposable gloves should be worn after donning a face mask.</p> <p>Staff must refrain from touching facial area wherever possible.</p> <p>Surfaces touched including tools should be wiped down and cleaned on completion of work.</p> <p>Gloves should be removed and disposed of or stored appropriately and hands washed thoroughly prior to removing the face mask.</p> <p>Gloves and masks should be disposed of correctly where appropriate and hands washed thoroughly on completion.</p>
CM-001146	Corrective Action	Live		<p>Berth holders using their boats then ongoing dynamic risk assessment and maintaining current social distancing should be adhered to by all and the boat owner should be reminded when this is not the case.</p> <p>When necessary the authorities should be contacted. Current government social distancing measures apply.</p>
CM-001147	Corrective Action	Live		<p>Until 4 July 2020, boat owners should not stay on their boats overnight, as per government guidance.</p> <p>Overnight stays on board all boats are permitted from 4 July 2020.</p> <p>Current government guidance also confirms that gatherings indoors should only occur in groups of up to 2 households.</p> <p>With the revised social distancing requirements (from 4 July 2020), 1m+ with mitigation measures and the permission of up to 2 households being allowed to gather indoors and stay in overnight accommodation/a boat, British Marinas interpretation of the guidance would therefore allow 2 households to stay on board a single boat as long as they were able to keep a 1m social distance whilst implementing additional mitigation measures.</p> <p>This is the responsibility of the boat owner and examples of how this could be achieved is outlined in the government guidance.</p>
CM-001148	Corrective Action	Live		Premier to provide usual staffing and facilities for these services.
CM-001149	Corrective Action	Live		<p>Visiting boats to the marina shall be permitted in a limited capacity from the 4 July 2020. The amount of visitors that can be accommodated vary in number per marina. International/non-domestic visitors are currently not permitted.</p> <p>All other measures contained in this risk assessment should be considered/adopted when accepting visitors.</p>

CM-001150	Corrective Action	Live		Ongoing dynamic risk assessment and maintain current social distancing measures at all times. Premier to provide usual staffing and facilities for these services.
CM-001151	Corrective Action	Live		Ongoing dynamic risk assessment and maintain current social distancing measures at all times. Premier to provide usual staffing and facilities for these services. All other fuel delivery risk assessments and safe operating procedures should be followed.
CM-001152	Corrective Action	Live		Formal Residential - Ongoing dynamic risk assessment and maintain current social distancing measures as per current guidance. Premier to provide usual staffing and facilities for these services.
CM-001153	Corrective Action	Live		Tenants operating in a marina must have confirmed in writing that they have considered COVID-19 in risk assessment for their activities. Ongoing dynamic risk assessment and maintain current social distancing measures as per current guidance. Premier to provide usual staffing and facilities for these services.
CM-001154	Corrective Action	Live		Minimum staffing levels are crucial and each marina should always have sufficient staff present to adopt emergency scenarios detailed in the Marina Emergency Response Plan (ERP). In the event of an emergency situation normal emergency procedures will apply - specifically surrounding Fire Safety and the ability to meet the requirements of the Regulatory Reform Fire Safety Order 2005 in the event of a fire alarm activation normal emergency procedures will apply. Where not possible the ERP must be amended accordingly.
CM-001155	Corrective Action	Live		Fire alarm, emergency lighting and other fire safety systems /checks/statutory maintenance obligations should be maintained wherever possible, including maintenance by 3rd party qualified engineers. Where not possible then the number of local checks should be increased and this should be recorded ensuring that any systems remain fully functional with the qualified engineer attending at the first available opportunity. The organisation's insurance company must be notified when statutory 3rd party checks are not carried out or maintained.
CM-001156	Corrective Action	Live		Evacuation routes must be maintained and checked regularly with COVID-19 measures being considered.

CM-001157	Corrective Action	Live	<p>During an evacuation of a building or any other area relevant staff should understand the evacuation strategy, COVID-19 and social distancing measures must be maintained including at Muster points. Muster points must be capable of accommodating all personnel whilst maintaining social distancing measures. Where this is not possible then additional Muster points must be identified, clearly marked with additional signage and any emergency procedure updated and distributed accordingly.</p> <p>PEEP's must continue to be conducted and reviewed where appropriate.</p>
CM-001158	Corrective Action	Live	<p>In order to reduce disruption, maintain fire safety and minimise the need for external persons (in this case Firefighters) to enter the premises at a time when there may be a COVID-19 transmission risk the following should be considered:</p> <p>If the fire alarm activates, commence the normal emergency procedures.</p> <p>Suitably trained staff should investigate the source of the alarm seeking to establish if it is a fire or a false alarm.</p> <p>If at any point during the investigation a fire is discovered or there is a smell of burning or smoke that cannot be accounted for, dial 999 and ask for the fire service immediately, stating that an evacuation is in progress.</p> <p>If, following the investigation, you are certain that there is no fire, and no suspicion of a fire, then the emergency procedures can be cancelled. Under these circumstances, do not call the fire service.</p> <p>The fire alarm system should be re-set by a competent member of staff and the fire alarm log book or Incident recorded on Engage updated with a record of the event.</p> <p>To prevent any unnecessary disruption, ensure that any known problems causing false fire alarms are immediately corrected, so that there is a high degree of confidence that fire alarms that do occur are genuine.</p>
