

WASTE MANAGEMENT AT CHICHESTER MARINA

To help maintain the high standards at the marina, here is a helpful guide to waste management at Chichester Marina.

General Waste

There are general waste bins (black lids) in the bin storage areas at the top of each bridgehead as well as at a number of additional locations around the marina. For large items there are 2 large general waste skip bins in the boatyard.

Recycling

Recycling waste bins (orange lids) are located in the bin areas at the top of each bridgehead as well as a number of additional locations around the marina. For large cardboard packaging there is 1 large recycling waste skip bin in the boatyard.

Mixed Glass

The smaller mixed glass bins (green lids) are also in the bin storage areas at the top of each bridgehead as well as a number of additional locations around the marina.

Hazardous Waste

Chichester's hazardous waste bins are located in the main boatyard. In addition to Chichester's bins we also have an Oil Bund which is only for used oil (petrol and other liquids must not be placed in the bund).

Dog Waste

Green dog waste bins are located around the marina adjacent to the public footpaths and bridleways.

If you find the closest bin is full please visit the next available bin and avoid an overflow situation that results in garbage being deposited on the ground.
