Entry into the Marina is via an automatic cill gate that is raised and lowered with the action of the tide, giving approximately 6 hours of access per tidal cycle. If required, there is an outer waiting pontoon adjacent to the Marina entrance. Please note that cill times are approximate and that depth over the cill can be affected by weather conditions and air pressure. All tide times and heights are corrected to local time and chart datum - no further adjustment is required. Heights are in metres. © Crown Copyright and/or database rights. Entry into the Marina is via an automatic cill gate that is raised and lowered with the action of the tide, giving approximately 6 hours of access per tidal cycle. If required, there is an outer waiting pontoon adjacent to the Marina entrance. Please note that cill times are approximate and that depth over the cill can be affected by weather conditions and air pressure. All tide times and heights are corrected to local time and chart datum - no further adjustment is required. Heights are in metres. © Crown Copyright and/or database rights. Entry into the Marina is via an automatic cill gate that is raised and lowered with the action of the tide, giving approximately 6 hours of access per tidal cycle. If required, there is an outer waiting pontoon adjacent to the Marina entrance. Please note that cill times are approximate and that depth over the cill can be affected by weather conditions and air pressure. All tide times and heights are corrected to local time and chart datum – no further adjustment is required. Heights are in metres. © Crown Copyright and/or database rights.
